Nganjuk, East Java, Indonesia

SUMMARY

Full-Stack Web Developer with 2 years of experience designing and developing web applications using Laravel, React, TypeScript, and relational databases. Delivered 10+ client and academic projects including e-commerce, parking management, library management, and farm monitoring systems. Experienced in translating business requirements into scalable applications through UI/UX design, full-stack development, testing, and deployment.

EDUCATION

Universitas Negeri Surabaya

Bachelor of Informatics Engineering (GPA 3.82/4.00)

Surabaya

September 2020 – August 2024

WORK EXPERIENCE

Futuremakers YEP (Plan Indonesia) • Internship

Full-Stack Web Developer

Online

November 2025 – March 2026

- Designed MongoDB database architecture with 5 core collections for an e-commerce platform.
- Developed 10+ RESTful API endpoints using Express.js, including authentication, product, category, transaction, and bank management services.
- Built 10+ responsive customer and admin pages from Figma designs using React, TypeScript, and Tailwind CSS.
- Implemented role-based authentication and integrated frontend applications with backend APIs.
- Developed and deployed a complete full-stack e-commerce system using Vercel (frontend) and Railway (backend).

WARKOD.ID • Freelancer

Full-Stack Web Developer & UI/UX Engineer

Hybrid (Online-Offline)

November 2024 – Present

- Co-founded and managed a two-person digital agency, handling project planning, client communication, cost estimation, and software delivery processes.
- Collaborated with 5+ clients to analyze requirements, propose technical solutions, and translate business needs into web-based applications.
- Designed wireframes, user flows, and user interfaces using Figma before implementing applications with Laravel, React, Tailwind CSS, MySQL, PostgreSQL, and Docker.
- Developed and maintained full-stack applications, including database design, feature implementation, API integration, version control with GitHub, and deployment activities.
- Performed functional testing and quality assurance to identify issues and improve application stability before client delivery.

Infinite Learning • Internship

Mentee Full-Stack Web Development

Online

August 2023 – December 2023

- Collaborated with a team of 5–7 members to develop a web-based task management application following the full software development lifecycle.
- Contributed to requirement analysis, wireframing, UI/UX design, frontend development, backend development, testing, and deployment activities.

- Developed application interfaces using HTML, CSS, JavaScript, Bootstrap, and Figma, with Laravel used for backend development.
- Managed project documentation, progress tracking, and reporting using Airtable while participating in weekly project presentations and demonstrations.
- Presented project milestones and demonstrated application functionality to mentors throughout each development phase until final delivery.

PT JAPFA Comfeed Indonesia Tbk • Internship

Staff Assistant in TI Development-Consumer Go Direct

Hybrid (Online-Offline)

January 2023 – May 2023

- Collaborated with a mentor in developing a hybrid farm management system to support employee attendance tracking, farm reporting, and operational monitoring activities.
- Contributed to requirement analysis, wireframing, UI/UX design, frontend development, backend development, database design, testing, and deployment using Agile Scrum methodology.
- Developed web and mobile application features including QR code attendance, farm check-in, reporting management, and operational monitoring dashboards.
- Implemented data visualization and reporting features to display livestock conditions, farm performance, and operational activities through interactive charts.
- Built application components using Vue.js, Ionic, TypeScript, AdonisJS, PostgreSQL, and Postman.
- Presented development progress regularly and delivered final project demonstrations to JAPFA stakeholders.

ADDITIONAL CREATIVE EXPERIENCE

Graphic Design Freelancer • Freelancer

Graphic Design & Editor

Online

January 2025 – Present

- Created promotional materials including posters, logos, and visual content for 5+ clients across personal brands, organizations, and communities.
- Designed logo concepts and digital assets using Adobe Photoshop and Illustrator.
- Produced motion graphic advertisements and promotional videos using Adobe After Effects and Premiere Pro.
- Developed visual content for product promotions, personal portfolios, and event documentation projects.

- Created thumbnails, promotional materials, and visual assets using Canva, KineMaster, and Adobe Premiere Pro.
- Assisted content production activities, including video shooting, editing, and publishing workflows.

Creative Editor • Freelancer

Community Development

Hybrid (Online-Offline)

February 2018 – April 2021

- Produced photography, videography, and video editing services for wedding and community events.
- Designed logos, banners, pamphlets, and promotional materials for local organizations and clients.
- Assisted content production and visual documentation activities from planning through final editing.

SMAN 1 Kertosono • Part-time

Multimedia Designer

Offline

June 2017 – March 2020

- Produced photo and video documentation for school activities and events.
- Designed visual materials including organizational charts, banners, and promotional assets.
- Served as cameraman and video editor for school anniversary events and multimedia projects.

PROJECTS

SportOn: Modern Sport E-Commerce

Februari 2026

Modern web-based e-commerce platform developed for buying sports equipment and apparel with integrated shopping experience and real-time transaction management.

- Designed the UI/UX using Figma.

- Developed the frontend using React, Tailwind CSS, and TypeScript.
- Developed the backend system using Express.js and MongoDB.
- Implemented shopping cart system, checkout flow, payment processing, and real-time transaction status tracking.
- Built an admin dashboard for product, category, bank, and transaction management with real-time updates.

Tech Stack: Figma, React, Tailwind CSS, TypeScript, Express.js, MongoDB

Parkir Universitas PGRI Kanjuruhan Malang

Desember 2025

Web-based parking management system developed to manage campus vehicle parking activities with real-time monitoring and automated transaction handling.

- Designed the UI/UX using Figma.
- Developed the frontend using Blade, Tailwind CSS, and JavaScript.
- Developed the backend system using Laravel and MySQL.
- Implemented barcode scanning for parking entry and exit, vehicle tracking, parking slot management, and automatic parking fee calculation.
- Integrated Docker and Html5-Qrcode to support development and barcode scanning functionality.

Tech Stack: Figma, Laravel, Tailwind CSS, JavaScript, MySQL, Docker, Html5-Qrcode

Perpustakaan SDK Santo Fransiskus Lawang

Juni 2025

Web-based library management system developed to simplify book management and student borrowing activities through digital automation features.

- Designed the UI/UX using Figma.
- Developed the frontend using Blade, Tailwind CSS, JavaScript, and AlpineJS.
- Developed the backend system using Laravel and MySQL.
- Implemented QR code scanning, Excel import/export, and digital borrowing receipt generation using DomPDF.
- Integrated Docker to support the development environment and deployment workflow.

Tech Stack: Figma, Laravel, Tailwind CSS, JavaScript, AlpineJS, MySQL, Docker, Excel, DomPDF

WARKOD.ID

February 2025

Website for a digital agency that focuses on providing digital consultations and offering digital product development services.

- Design UI/UX using Figma.
- Develop the website frontend using HTML, CSS, and JavaScript.

Tech Stack: Figma, HTML, CSS & JavaScript

KitaPTN

March 2024

Website to help with learning, taking practice tests, and simulating exams for preparation to pass university.

- Design website wireframe and make a web design with Figma.
- Develop website frontend with Blade and TailwindCSS.
- Develop website backend with Laravel and manage database using MySQL.

Tech Stack: Figma, TailwindCSS, Node.js, Laravel & PHP

KitaAktiv

October 2023

Website to help organize, track, and complete tasks using a to-do list method.

- Create website development process management using Airtable.
- Design website wireframe and website interface with Figma.
- Develop and design the website frontend using HTML, CSS and JavaScript.

Tech Stack: Airtable, Figma, HTML, CSS, & JavaScript

Farmlace

February 2023

Hybrid farm management system designed to help livestock companies monitor, record, and optimize farm operations through web and mobile platforms.

- Designed wireframes and UI/UX using Figma.
- Developed the frontend using Vue.js and Ionic with TypeScript for web and mobile (Android) interfaces.
- Developed the backend using AdonisJS and Node.js, with PostgreSQL as the database.
- Tested and validated API endpoints using Postman during development.
- Implemented features for employee attendance tracking, farm reporting, and real-time operational monitoring.

Tech Stack: Figma, Vue.js, Ionic, TypeScript, AdonisJS, Node.js, PostgreSQL, Postman

Psychocare

December 2022

Website that offers consultations and shares information about mental health.

- Build Mindmap and continue design the website using Figma.
- Create website development process management using Trello.
- Develop and design website frontend using HTML, CSS and JavaScript.

Tech Stack: Figma, Trello, HTML, CSS & JavaScript

ThriftShop

October 2022

Website that offers consultations and shares information about mental health.

- Develop and design the website frontend using HTML, CSS and JavaScript.

Tech Stack: HTML, CSS & JavaScript

TECHNICAL SKILLS

Languages: JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | SQL | PHP

Frontend Skills: Blade | React | Vue.JS | TailwindCSS | Bootstrap | Responsive Design

Backend Skills: Laravel | Node.JS | Express.JS | AdonisJS | REST API Design

Database: MySQL | PostgreSQL | MongoDB

Testing: Postman

DevOps & Tools: Git | GitHub | Docker | Vercel | Railway | Figma

Practices: Agile/Scrum | Code Review | Unit Testing
